

Table 1. The crude rate ratios of lung cancer incidence density, lung cancer mortality and all-cause mortality comparing the screened with non-screened groups											
Lung cancer incidence				Lung cancer mortality				All-cause mortality			
Overall				Overall				Overall			
Sex				Sex				Sex			
Female				Female				Female			
Age group				Age group				Age group			
50–54				50–54				50–54			
55–74				55–74				55–74			
Family history				Family history				Family history			
Yes				Yes				Yes			
Occupational hazard				Occupational hazard				Occupational hazard			
Yes				Yes				Yes			
Chronic resp. disease				Chronic resp. disease				Chronic resp. disease			
Yes				Yes				Yes			
0.25				0.25				0.25			
RR (95% CI)				RR (95% CI)				RR (95% CI)
